## Australian Informatics Competition Thursday, 19th May 2011

The AIC focuses on the skills behind computer programming and algorithm design, but does not require any specific knowledge of programming or programming languages. It is a good exercise for a mathematics class!

---

## Australian Informatics Olympiad Thursday, 1st September 2011

The AIO is a programming competition in which there are three problems to solve in three hours. Source code may be submitted in C, C++, C#, Pascal, PHP, Python, Java or Visual Basic.
